DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: On page 13, the second to last line, it is thought that "11" should be changed to --9--. On page 14, line 9, it is thought that "providing" should be changed to --provide--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2-5 and 8-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, line 2, the recitation that the seal is positionable between the "inboard" section and the top surface of the sidewall is incorrect in that it is located between the outboard section and the top surface of the sidewall. This instance of an inaccurate recitation also appears on line 11 of claim 8.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ninness et al. Ninness et al. disclose the claimed invention including "sidewall" 23 with frame portion 9 associated therewith. The frame portion 9 includes a horizontal section with a vertical portion bisecting the horizontal section into inboard and outboard portions.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ninness et al. in view of Dimmer.

Ninness et al. disclose the claimed invention except for the specific manner of connecting the cover to the frame.

Dimmer discloses a cover removably attached to a frame by hook and loop fasteners.

Art Unit: 3612

It would have been obvious to one of ordinary skill in the art at the time the invention was made to removably attach the cover of Ninness et al. to the frame by hook and loop fasteners as taught by Dimmer as an alternate, functionally equivalent securement means.

Allowable Subject Matter

7. Claims 2-5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

8. Claims 8-12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
